(Power Division)

Single Phase Servo Stabilizer

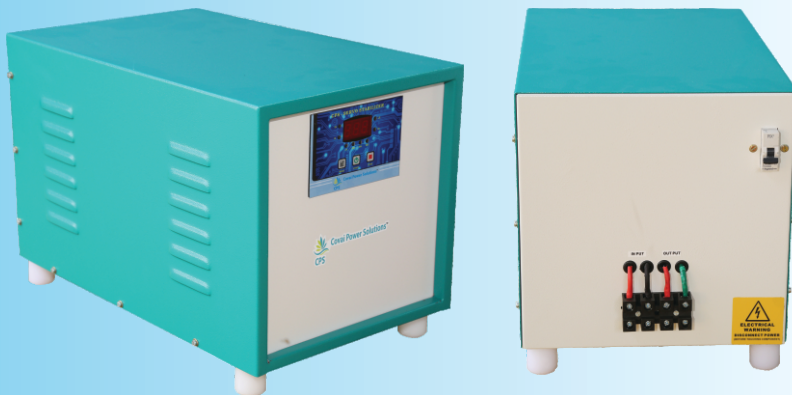

1KVA - 5 KVA

A voltage stabilizer is an Electrical & Electronic device that supplies a consistent output voltage irrespective of input supply (Depending on Input Range). It protects Electric / electronic appliances from under and over voltage supply. A Servo voltage stabilizer functions (Through Servo Motor) to automatically maintain a constant voltage (+/- 1% Variation) of the voltage for our electrical appliances.

Single Phase Servo Stabilizer

10 KVA - 25 KVA

Applications:

- Bio Medical Machineries
- Textile Machines
- Laboratory Equipments
- CNC & VMC Machines
- Tele Communications Network
- Printing Machines

Three Phase Servo Stabilizer - Air Cooled

1 KVA - 100 KVA

Three Phase Servo Stabilizer - Air Cooled

1 KVA 2500 KVA

Head Office : 3/105, Varuthaiangarpalayam, Keeranatham, Coimbatore - 641 110.
Phone : 81220 70761 / 62 / 63 / 64
